SALE DAY 2025

YOUR INVITATION TO PROGRESS

On behalf of the Bateman family and the entire Gilmandyke team, we're proud to welcome you to our 2025 Bull and Production Sale.

It's been a tough lead-up, with one of the driest autumns in recent memory followed by the coldest June we've seen in 40 years. Despite this, our cattle have continued to perform, a testament to our focus on breeding livestock that are functional, resilient, and built to last.

At Gilmandyke, our large-scale 3,500-head commercial program remains the foundation of everything we do. It shapes our stud decisions and ensures we stay focused on delivering real-world performance for commercial producers. This year's offering features 117 bulls across three age groups: 2-year-olds, 18-month-olds, and yearlings. Each has been bred with fertility, structure, longevity, and genetic progress front of mind.

We're also excited to introduce two new initiatives designed to add further value for our clients:

Heifer Select DNA Testing - A complimentary service helping you better understand the genetic makeup of your replacement females.

This tool adds depth to your selection decisions by giving greater context to the EBVs of sale bulls. Let us know if you'd like to get involved, we're here to help.

Gilmandyke Rewards – Semen Loyalty Program.

As a thank you to our bull buyers, Gilmandyke semen will be available for just \$10/unit, up to 12 months post-purchase. This offer is subject to semen limits and T&Cs, and is designed to support your program with proven sires at an affordable price.

Our program remains female-driven, and the consistency you'll see in the bulls on offer is the result of heavy selection pressure and disciplined breeding. Some of this year's sale bulls have already been collected and used within our own commercial and stud programs, a strong endorsement of the draft's depth and quality.

We're always glad to have visitors on farm and encourage you to stop by any time before sale day or throughout the year. We also look forward to getting out and visiting as many of you as we can across the back end of 2025 and into 2026.

Thank you for your continued support. We look forward to seeing you on sale day.

— The Bateman Family & Gilmandyke Team

SALE INFORMATION

Discount

We are pleased to offer a \$500 discount on a bull purchase when combined with the purchase of a female lot.

Rebate

We are pleased to offer a 5% rebate to all agents who attend with or on behalf of their clients and settle within seven (7) days.

Transport

Gilmandyke Pastoral will deliver Bulls free of charge to the Regional Livestock Exchanges in Yass, Carcoar, Forbes, Dubbo and Tamworth.

Payment

EFTPOS: For the convenience of our buyers B&L Livestock will have EFTPOS facilities on the day; accepting Visa and Mastercard.

Heifer Select

At Gilmandyke, we're bringing the Heifer Select Program directly to your operation. Our team will join you on-farm to sample a percentage of your replacement females, providing valuable data and insights. This service empowers you to make more informed decisions with the support and guidance of the Gilmandyke team.

Semen Loyalty

Semen Loyalty Program. As a thank you to our bull buyers, Gilmandyke semen will be available for just \$10/unit, up to 12 months post-purchase. This offer is subject to semen limits and T&Cs, and is designed to support customer programs with proven sires at an affordable price.

Online Bidding & Livestreaming

Stock Live and AuctionsPlus will facilitate livestreaming and online bidding on the day. Please register with B&L Livestock and use your AuctionPlus account

Sale Location

Gilmandyke Pastoral Stud is located at "Kangaroobie" 1346 Mitchell Hwy, Orange NSW.

Time

1:00pm

Inspection

Inspection from 10.00 am on sale day.
Inspections at any other time are welcome.

Refreshments

Morning tea and a light lunch will be available.

Insurance

It is our recommendation that insurance is taken out on all purchases. Representatives will be available on the day.

Health

All bulls have been ear notch tested free of Pestivirus (BVDV). They have been vaccinated with 2 doses of Pestiguard, 2 doses 7 in 1 and 2 doses of Vibrovax. AM, NH, CC, CA and DD status is shown in each lot heading. No bulls on offer have had any feet treatment. All sale bulls are vet inspected for structure and breeding soundness

Guarantee

All necessary precautions have been taken prior to sale to ensure the bulls are fit, including independent third-party veterinary inspections, semen evaluations, and structural soundness assessments. Gilmandyke Pastoral provides a six-month guarantee on the bulls from the date of sale. If a bull is confirmed infertile or unable to serve, excluding cases caused by injury or disease, Gilmandyke will credit the purchase price minus salvage value. Gilmandyke Pastoral accepts no liability for production losses beyond a 90-day pregnancy check conducted by a qualified veterinarian or pregnancy scanner. While every effort has been made to verify the bulls' working abilities, we are committed to assisting you should any issues arise with your purchase. Please contact us immediately if a problem occurs so we can work towards a resolution.

Multiple Bull Purchases

The bulls in this year's sale have been run in three separate groups to minimise injury, if planning on making multiple purchases please discuss with Gilmandyke staff to find out if bulls are from same mob.

Delivery

Gilmandyke Pastoral will deliver bulls free of charge to the Regional Livestock Exchanges in Yass, Carcoar, Forbes, Dubbo and Tamworth.

Bull Transfer

Bulls will incur no charge for transfer. Please provide herd prefix on registration. Safety We select animals with traits of good temperament and ease of handling. However, all animals can be unpredictable, particularly if stressed.

Visitors enter pens at their own risk.

- Children are not permitted in the pens
- Do not overcrowd the pens
- Keep movement and noise to a minimum
- Be aware of your surroundings

Semen Rights

Gilmandyke Pastoral retains the right to collect up to 1500 straws of semen from all bulls sold. Gilmandyke Pastoral will collect the semen by agreement with the bull owner at Gilmandyke Pastorals' cost. This will be for Gilmandyke Pastoral and Customer use only.

Disclaimer

People entering upon this property for any purpose whatsoever, including attendance at cattle auctions, do so at their own risk. We are not liable to you for any personal injury or death suffered by you or for theft, loss or damage to any property caused or contributed to by us or any other person whether caused or contributed to by or by negligence deliberate act or unlawful conduct. "We" or "us" or "our" refer to the owners, their employees, contractors and agents and each of them. While every care has been taken in compiling this catalogue to ensure accuracy of information supplied, no responsibility is accepted for any errors which may have occurred. Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder nor owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

The Backbone of Productivity: Gilmandyke 2025 Commercial Offering

The Gilmandyke commercial herd remains the backbone of our operation. With over 3500 breeding females, our focus is on producing functional, reliable cows that thrive in commercial settings. Every female in the program is expected to perform, from conception through to weaning, with efficiency and consistency.

To earn her place, a female must calve easily, grow quickly, be structurally sound and display quiet temperament. She must conceive within a tight six week joining, rear her calf while maintaining condition, rejoin, and raise another healthy weaner. These are the core traits that drive long term productivity and what we define as a truly functional female.

We're proud to present one of our strongest commercial offerings yet:

70 PTIC heifers joined via artificial insemination to Landfall Trademark T1832, a structurally sound, easy doing bull with excellent fertility and carcass traits. Trademark was purchased for \$75,000 from the 2024 Landfall Spring Bull Sale. This is the first time we have offered his genetics commercially to our customers with the first sons set to lead the sale in 2026. These heifers were AI'd on January 13th and are due to calve from late October 2025.

60 two year old commercial females with calves at foot, sired by Gilmandyke Unstoppable U176. Unstoppable is a soft muscled, thickset young sire with a quiet temperament, good calving ease, and top 5 percent marbling in the Angus breed. He was the first Baldrige Versatile son sold at Gilmandyke and topped the 2024 sale at \$100,000. These females are open and ready to join. This marks the first public release of Unstoppable's progeny.

Full lot details are available via AuctionsPlus, StockLive, the supplementary sheet or pen cards on sale day.

Purchaser:..... \$.....

Note:

Unfortunately, our heifers weren't quite ready for photos at the start of July, and we want to ensure they are presented in their best condition. We are currently finalising preparations, and high-quality photos and videos will be available by the first week of August.

If you're interested in the draft or would like to get a preview as soon as content becomes available, please feel free to reach out to any member of our team. We'd be more than happy to answer questions or arrange early access to the footage once it's ready.

Emillesque V336 is a lovely wedge-shaped Thor T265 daughter out of a young PM donor cow. She has great muscle shape and is beautifully mobile. This pedigree combines two of the most influential sires that we have used in the last five years with 2 prominent donor cows in our herd. This breeding runs deep in our program.

Eva V465 is the youngest heifer in our offering, she has a later maturing pattern with great overall balance, sound structure and extension. Eva R104 has been an exceptional breeding female and the combination of PM, 38 Special, the Eva family and the Emillesque family in this heifer makes her a great opportunity.

Versatile by Name, Outstanding by Nature

Gilmandyke Angus Celebrates a record breaking sale of U176 during the 2024 Spring Bull Sale.

In August 2024 Gilmandyke Angus celebrated a landmark moment. The sale of Lot 21, Gilmandyke Versatile U176 for an impressive \$100,000 to Corio Ag, Cootamundra, NSW. It was a powerful reflection of what's possible when passion, patience and a deep rooted commitment to quality all came together to create such an animal.

"It was an amazing feeling, really gets the adrenaline going." - Jack Newham

Standing alongside a lineup of top-quality bulls, Versatile U176 lived up to his name from the beginning. With depth, softness, structural correctness and an easy-going temperament, he was the complete package, and buyers knew it. The atmosphere around the ring when he was shown said it all.

"We knew he was something special" said Henry Bateman, "He just had that look about him, style, shape and a really sound makeup. He is the kind of bull that just ticks every box and to see him go on and sell for \$100,000 is pretty surreal, and a huge credit to the whole team here."

For Henry though, the highlight of the 2024 sale wasn't just the \$100,000 result, it was seeing so many buyers walk away with bulls that offered real value to their operations.

"There's got to be a bull available for everyone at the right price" Henry said. "It's a thrill to see a top end result, sure but the proudest moment is knowing that good commercial producers are getting access to great genetics that work for them."

The Gilmandyke program is the product of decades of thoughtful breeding and hands on herd management. **"We're just trying to get more progressive and more productive every step we do so that everything is measured and planned to try and get the most out of what we're doing."**
- Wade Peatman

U176 is a direct example of this. He represents years of careful genetic planning, data driven results and a realistic approach to producing quality cattle that perform in the paddock, on paper and in person.

While the \$100,00 milestone marked a day not soon to be forgotten, the Gilmandyke team are already focused on what comes next. With exciting young bulls on the rise and a strong foundation of elite females, the 2025 sale promises to deliver yet again.

The team remains focused on daily care, genetic improvement and keeping true to the values that built the Gilmandyke reputation from the beginning - consistency, honesty and cattle that speak for themselves.

Join us at Gilmandyke Pastoral Stud is located at Kangarooobie on Thursday, 28th August 2025, for our annual Spring Bull Sale.

Inspections open at 10am, and the sale will commence at 1pm.

We look forward to seeing you there.

BRINGING YOUR NEW BULL HOME

When purchasing a bull, care and handling after the sale can be as important as the purchase itself. Looking after your bull well during the initial stages of his working life may ensure longevity and success within your breeding herd.

Purchase

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled.

Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

Delivery

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

If you use a professional carrier:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

Arrival

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull.

These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice. Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

BRINGING YOUR NEW BULL HOME

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice. Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

Mating new young bulls

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows. Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later. When the young bulls are working, inspect them regularly and closely.

Managing Older Herd Bulls

Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability. All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

During mating

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

Northern Australia

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straightbred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

Adaptation

They key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

Purchase in cooler months

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

Change of feed source

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

Managing Cattle Ticks

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember male are more susceptible to ticks than females.

How to Register and Bid on AuctionsPlus

- 1** Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2** Select “Sign Up” in the top right hand corner.
- 3** Fill out your name, mobile number, email address and create a password.
- 4** Go to your emails and confirm the account.
- 5** Return to AuctionsPlus and log in.
- 6** Select “Dashboard” and then select “Request Approval to Buy”.
- 7** Fill in buyer details and once completed go back to Dashboard.
- 8** Complete buyer induction module (approx. 30 minutes).
- 9** Auctions Plus will email you to let you know that your account has been approved.
- 10** Log in on sale day and connect to auction.
- 11** Bid using the two-step process - unlock the bid button and bid at that price.
- 12** If you are successful, the selling agent will contact you post sale to organise delivery and payment.

Steps To Register

Using your chosen device visit www.stocklive.com.au.

Click **BID** located next to the sale you wish to participate in.

New Users

To create an account click **REGISTER**. Fill in your details, then click **CREATE BIDDER REGISTRATION**.

You will receive an email prompting you to confirm your account, create a password, accept Bidder Account T&C's & Privacy Policy.

Congratulations! Your StockLive account has been created.

Existing Users

LOGIN and find the sale you wish to bid on, click **Request to bid** & **Accept terms to bid**.

On Sale Day

Visit www.stocklive.com.au, when the sale is flashing **LIVE**, click **BID** to watch, listen & purchase.

Invoicing and delivery will be carried out as per your registration & account details by the respective selling agents.
